Areas of Use

1. Production Management:

Seamcor can assist in managing and optimising production processes, ensuring efficient tracking of production metrics, quality control, and scheduling.

2. Supplier Management:

Custom data tables facilitate the management of supplier information, order tracking, and performance evaluation, enhancing overall supplier management processes.

3. Quality Management:

Customisable forms and tasks support tailored processes for inspections, testing, and quality control, ensuring products and materials meet the required standards.

4. HR Management:

The departmental organisation feature is beneficial for HR departments to manage employee data, and handle tasks related to recruitment, onboarding, and training.

5. Risk Management:

Seamcor can be utilised to create custom workflows for risk assessment, tracking, and mitigation strategies, contributing to effective risk management practices.

6. Preventative Maintenance:

Custom forms and tasks aid in scheduling and tracking preventative maintenance activities for equipment, reducing downtime and extending asset lifespan.

7. Fleet Management:

The software supports custom data tables for tracking and managing fleet information, maintenance schedules, and fuel usage, enhancing overall fleet management.

8. Asset Management:

Customisable data tables contribute to efficient tracking of asset information, maintenance schedules, and depreciation, streamlining asset management processes.

Areas of Use

9. Health & Safety Management:

Custom forms designed for health and safety data, along with workflows for compliance, contribute to creating a safer working environment.

10. Lab Management:

Seamcor can be used to manage laboratory data, equipment calibration schedules, and test results, ensuring accuracy and compliance with industry standards.

11. Staff Training:

Custom workflows for staff training can be implemented, tracking training programmes, certifications, and ensuring compliance with regulatory requirements.

12. Legal Case Manager:

The software can assist legal departments by providing custom data tables for case management, document tracking, and workflow automation, enhancing efficiency.

13. Privacy Management:

Customisable forms and workflows can aid in managing privacy-related data, ensuring compliance with data protection regulations and enhancing privacy management.

14. Sustainability Management:

Seamcor's customisation options can be utilised to track and manage sustainability metrics, supporting an organisation's efforts towards environmental responsibility.

15. Secure Document Repository:

Seamcor's customisable data tables incorporate a secure document depository, allowing organisations to store and manage sensitive documents with enhanced data security measures.

In summary, Seamcor's adaptability and customisation features make it a valuable tool across diverse areas within any organisation, enhancing efficiency, compliance, and overall operational effectiveness.

Software Functionality

The Seamcor software stands as a fully customisable Business Information & Workflow Management system designed for universal application across any organisation. With the capability to collect, process, store, and distribute consistent business information, this system provides a dynamic and adaptable solution for your organisation's unique needs.

1. Customisable Data Tables:

- System administrators have the power to create tailored data tables for each area within the business.
- These tables support data validation, triggers with workflow automation, email alerts, and seamless integration with other data tables.
- The data tables also provide the capability to securely store and manage documents associated with each business area.

2. Departmental Organisation:

- Departments, representing specific functions or tasks within the organization (e.g., quality, finance, human resources, operations), can be easily created.
- Administrators of these departments can grant access to specific data tables, ensuring a controlled and secure data environment.

3. User Access Management:

- Department administrators have the authority to invite users into their respective departments and customise their access levels to data tables, tasks, and forms.
- This feature facilitates precise control over who can view, edit, or manage specific sets of data.

4. Custom Forms and Tasks:

- Each department has the flexibility to build custom forms and tasks, specifically crafted for data capture on any browser enabled device or the native Seamcor mobile app.
- Tasks can be scheduled or assigned to individual users or user groups, incorporating triggers, email alerts, videos, photos, and signatures.

The Seamcor software is a holistic solution that not only centralises business information but also streamlines workflows across departments. By providing extensive customisation options, user-friendly interfaces, and robust access control, our system empowers organisations to optimise their information architecture and enhance overall operational efficiency.

Software Support

Our commitment to exceptional support is at the heart of our service philosophy. Resolving critical or serious customer support calls is our top priority, and we take pride in delivering excellence at every step.

To ensure efficient and seamless support, we employ Zoho Desk, a comprehensive platform that allows us to manage the entire support cycle with precision. This enables us to respond promptly and effectively to our customers' needs, providing a swift resolution to any challenges they may encounter.

All our valued customers benefit from our Premium software support package, available seven days a week, from 8:00 to 20:00 (excluding Christmas Day). We understand that issues can arise at any time, and our extended support hours reflect our dedication to being there when you need us most. Importantly, the cost of this robust support service is seamlessly included within the software rental, ensuring that our customers receive the assistance they require without any additional financial burden. Our Premium Support includes updates & upgrades, issue resolution and remote assistance.

Project delivery and consultancy

We believe in delivering more than just software — we're committed to providing a comprehensive suite of services that elevate your experience and maximize the value of our solutions. Our three core service offerings cater to the diverse needs of our esteemed clients.

Account Management:

Every Seamcor customer is paired with a dedicated, seasoned account manager. Serving as your primary point of contact, your account manager is more than just a liaison; they're a strategic partner dedicated to understanding your unique business requirements. Working collaboratively, we ensure that you not only harness the full power of our software but also receive the best return on investment. Your success is our priority, and your account manager is here to make it happen.

Fully Managed Service:

Opt for simplicity with our Fully Managed Service. Charged per customer site, this comprehensive solution includes online installation and configuration, system reviews and scoping, custom database and task setup, and thorough online training.

The cost-effectiveness of our Fully Managed Service often proves to be more advantageous than opting for separate consultancy services. Choose the convenience of Fully Managed Service, available separately with flexible terms and billing frequencies. The fully managed service operates Monday to Friday from 08:30 to 17:00 (excluding UK bank holidays).

Consultancy:

For projects or requirements that go beyond the standard, our industry experts offer tailored consultancy services. Whether it's conducting a gap analysis on current processes, providing advice on business compliance, or reviewing external audit reports, our consultancy services address specific needs to ensure your success.

The benefits of Seamcor

1. Enhanced Data Management:

Seamcor's customisable data tables enable efficient collection, processing, storage, and distribution of consistent business information, including a dedicated feature for secure document storage.

2. Improved Organisational Structure:

The departmental organisation feature facilitates a structured representation of functions or tasks within the organisation, promoting clarity and efficiency.

3. Efficient User Access Control:

User access management provides precise control over data access, ensuring a secure and controlled data environment, thereby reducing the risk of unauthorised access.

4. Tailored Forms and Tasks:

Custom forms and tasks allow each department to capture data seamlessly, promoting flexibility and adaptability across various devices. This enhances overall data accuracy and efficiency.

5. Streamlined Workflows:

Seamcor's holistic solution centralises business information and streamlines workflows across departments. This results in improved collaboration, faster decision-making, and enhanced overall operational efficiency.

The benefits of Seamcor

6. Optimised Information Architecture:

The extensive customisation options provided by Seamcor empower organisations to optimise their information architecture, tailoring it to their unique needs and processes.

7. User-Friendly Interfaces:

The system offers user-friendly interfaces, ensuring that users can navigate and utilise the software efficiently. This contributes to increased user adoption and satisfaction.

8. Robust Access Control:

The system's robust access control features, including customisable user access levels, contribute to a secure and compliant data management environment.

9. Increased Productivity:

Seamcor's automation features, such as workflow triggers and task scheduling, contribute to increased productivity by automating repetitive tasks and reducing manual effort.

10. Adaptability and Mobility:

The ability to create custom forms and tasks for any browser-enabled device or the native Seamcor mobile app enhances adaptability and allows users to capture and access information on the go.

In summary, the Seamcor software offers a comprehensive solution that goes beyond mere functionality, providing tangible advantages such as improved data management, streamlined workflows, enhanced security, and increased overall productivity for organisations, including dedicated features for efficient document storage.

Hosting & Hardware

At Seamcor, we recognise the unique and diverse needs of every organisation. We firmly believe in tailoring solutions to fit your distinct requirements rather than imposing a one-size-fits-all approach. Our Seamcor Cloud offers a hassle-free and secure way to utilise our software, eliminating overheads for your internal IT department.

For organisations with specific data storage or security needs, or those preferring to keep everything centralised within existing data centres, our On-prem or Private Cloud option provides the flexibility and control you seek.

The Seamcor Cloud:

Seamcor Cloud is hosted on Microsoft Azure, leveraging cutting-edge features for optimal performance and reliability.

Key Features:

- **CI/CD Integration:** Full Continuous Integration/Continuous Deployment with automated testing for quality control.
- **High Availability:** Scalable services with backup mechanisms for uninterrupted operations.
- **Security:** Cloudflare protection to prevent DDoS attacks and enhance overall performance.
- **Monitoring:** Azure App Insights provides real-time monitoring and rapid issue resolution.

Core Components:

- **PostgreSQL:** Azure-hosted Postgres with daily backups for customer and system databases.
- **Redis:** Caching service for enhanced performance.
- **App Service:** Azure-hosted App services ensuring high availability for the API.
- **Cloud Storage:** Azure Cloud Storage (BLOB) for scalable and secure storage, exclusive to the API.
- **OpenSearch:** Advanced reporting and data analytics.

Platforms:

- **Web Frontend:** Compatible with any modern browser.
- **Android:** Mobile app available on the Google Play store.
- **iOS:** Mobile app available on the Apple store.

Hosting & Hardware

On-prem or **Private Cloud:**

Setup Information:

- **Docker** installed and ready to host the software.
- **2 DNS names** where that the server will respond to on the same IP (1x UI, 1x Dashboards), like: seamcor.abc-company.com and seamcor-dashboards.abc-company.com
 - Valid host names (<https://caddyserver.com/docs/automatic-https>)
 - In addition, hostnames qualify for publicly-trusted certificates if they:
 - are not localhost (including .localhost, .local and .home.arpa TLDs)
 - are not an IP address
 - have only a single wildcard * as the left-most label****
 - A/AAAA records must be added in order to generate the certificate
 - An email address, that will be used to generate the Certificate
- **VPN details** for connection to the local network.
- **Login details** for connecting to the server.

Mobile Apps:

IOS App: (iPhone & iPad)

- iOS 17 or newer
- 3GB RAM
- 16GB of storage
- 12MP camera
- Wifi / Cellular connectivity
- Built in microphone
- 4.7 inch screen size

Android App:

- Recommended Android 13 or newer
- Minimum version Android 8.1
- 2GB RAM, 16GB storage
- 5MP Camera, WIFI/Cellular connectivity
- Built-in microphone, 4.7-inch screen size (1080p resolution)

Container Components:

The components will automatically update to the latest version (can be disabled if required).

- **Angular Application** - inside a Caddy proxy allowing 'single port' use for constrained environments.
- **WebAPI application**, handles the endpoints for the application.
- **JobEngine** - out queue and out of process server to handle email, (soon) licence sync, media encoding, etc.
- **OpenSearch Dashboards** - a rich UI for visualising data.
- **OpenSearch** - a fully featured search engine.
- **Postgres** - a fast efficient database system.
- **RabbitMQ w/ Hangfire** - allows scheduled operations as well as a queueing system for all out of process operations in the system.

File Storage Options:

- Azure Cloud Storage Account.
- Local file system.
- Future compatibility with alternative cloud providers (e.g., Amazon S3).

Hardware Platform:

The system can be deployed on any platform managing containerised workloads or services, such as Docker and Kubernetes.

Dedicated Server Options

Linux

Latest version of Linux Ubuntu LTS with 2 Core Processor, 16GB RAM, 500GB Disk Space

General Information

- The Disk Space, processor and RAM are adjustable based on usage requirements.
- Configuration includes Components hosted inside a Docker container with local backups.
- Customer is responsible for remote backups.

Pricing Explained

Base Package

£169

per month (billed annually)*

- ✓ 50GB data
- ✓ Premium Support
- ✓ Unlimited Departments
- ✓ Available across multiple sites / business units

* Monthly Billing available at a premium of 10%

Concurrent Licence

£41

per month (billed annually)*

- ✓ 15GB additional company data per licence
- ✓ Can be assigned to unlimited users
- ✓ Access to Web & Mobile app
- ✓ User access depends on licence availability

* Monthly Billing available at a premium of 10%

Named Licence

£29

per month (billed annually)*

- ✓ 10GB additional company data per licence
- ✓ Assigned to a single user
- ✓ Access to Web & Mobile app
- ✓ 100% availability

* Monthly Billing available at a premium of 10%

- Premium Support includes updates & upgrades, issue resolution and remote assistance.

Some of our Customers

Trusted by a diverse spectrum of clients, ranging from multinational corporations to small enterprises, our impact spans across various industries, including Retail, Manufacturing, Mining, Food Production, and Circular Services. With strategic offices in The Netherlands, South Africa, and the United Kingdom, we serve customers seamlessly across Europe, the United Kingdom, Africa, and the United States.

“

“We are delighted to have partnered with Seamcor. Our in-store colleagues and compliance teams can access vital information at the click of a button without the need to wade through stacks of paper. This will save our colleagues a lot of time and allow them instead to use their expertise in wellness to help support even more of our customers.”

Lisa Widdison,

Director of Retail Operations at Holland & Barrett

“Using the Seamcor software has made a significant and tangible difference to our process. We are very pleased with the low-cost innovation which has helped with day-to-day challenges such as ensuring inspections are systematically undertaken, centrally monitored and most importantly allowed us to react in real-time as challenges are identified.”

Ricardo Sousa,

Technical Manager at Gressingham

“Seamcor is a great organisation, because the answer is never ‘no’. They always say, ‘Yes, we can make something happen’.”

Duncan MacMillan,

IT Director at Elis

“The Seamcor software has revolutionised our ability to manage compliance across our business, their versatility and approach has been nothing short of game changing. Their turnaround responsiveness in relation to the development of the software to enable real-time, daily checks for COVID was impressive, they have become our partner in every sense of the word.”

Sollie Swanepoel,

BIS Group Manager at Samancor

“Following the software integration, we have seen significantly reduced auditing times, as well as overall efficiency improvements. Our recent BRC Double A grade was largely achieved by the fact that we can now easily create and submit clear audit reports. Quite simply, Seamcor helped us grow. I could not see our business running without it now.”

David Elmer,

Operations Director at Puratos UK
